

Using Prezi

Prezi is a presentation tool which you can access from any computer, smartphone or tablet.

On a computer, it works best on Google Chrome.

Getting started

To start a presentation, click on the right arrow at the bottom of the presentation – this will take you to the first screen.

Moving on

After the first slide, click the right arrow to continue. If at any time you need to go back, or reset the zoom, click the left arrow.

Zooming and full screen view

- To view the content in full screen, which may make it easier to read, click the icon on the bottom right of the presentation window (see the diagram below).

- To get out of the full screen, press the Esc button or click on the square icon again.
- You can zoom in and out of the presentation. To zoom in, simply click on the presentation or use the mouse wheel to zoom in and out.

Autoplay

To autoplay the presentation, click on the cog icon on the bottom right corner. It will offer you different speed options.

IT requirements

For Prezi to work properly, please make sure you are using the following version (or higher):

- Mozilla Firefox 3.5
- Google Chrome 21
- Safari 4.0
- Internet Explorer 9

Note: Flash version 11.1 is required.
