

Do you know someone with MS?

Multiple Sclerosis (MS) is a condition that affects your brain and spinal cord, the coating that protects your nerves (myelin) is damaged. This causes a range of symptoms like blurred vision and problems with how we move, think and feel, symptoms vary in individuals. There is no current cure, but there are medications available to manage the condition and symptoms.

Asian MS is a national group that offers tailored and culturally-sensitive services for Asian people affected by Multiple Sclerosis. We:

- Raise awareness of MS within the Asian community
- Bring people within the Asian Community together
- Provide services and support.
